📍 Rey, Tehran, Iran

Profile Summary

Innovative Control & Machine Learning Engineer with a proven track record of designing and implementing robust control systems to optimize processes and enhance efficiency across diverse industries. Proficient in developing and deploying AI models and algorithms to tackle diverse challenges across industries. Skilled in MATLAB and Python using TensorFlow and PyTorch, with a focus on optimizing performance and scalability. I am also skilled in PLC programming, HMI development, robust linear and nonlinear controller design using classical methods alongside AI techniques

Skills

Education

Diploma in Mathematics	2016
Institute/School: Sama High School Mahallat, Markazi, Iran GPA: 3.96	
Bachelor of Electirical Engineering	2016 - 2020
Branch: Control Institute/University: Amirkabir University of Technology Tehran, Iran GPA: 3.06/4	
Master of Electirical Engineering	2021 - 2024
Branch: Control Institute/University: Amirkabir University of Technology Tehran, Iran GPA: 3.44/4	

Work Experience

AI Papers Annotator	December 2021 - May 2022
Textract Tehran, Iran	
PLC and HMI Programming	June 2020 - October 2020
Gheshm Voltage Tehran, Iran	
Embedded System Programming	November 2024 - June 2025
Tarsim Sanat Hooshmand Tehran, Iran	

Projects

Modeling and Control of a Three-Dimensional Overhead Crane Robot	2019
For: Modern Control Course	

Language

English

Persian

Social Network

mrmalekjan

mohammadreza-malekjan-5878b1244

mohammadrezamalekjan

Fuzzy controller design and simulation of a gymnast robot

For: Computational Intelligence Course

2021

Designing a deep learning model for persian voice command classification in smart home devices using based on Tensorflow

For: Computational Intelligence Lab

2021

Android application ,PI controller design and identification of lighting system of smart homes

For: BSc Project

2021

Linear MIMO power controller desgin for a jet engine

For: MIMO control course

2022

Simulating a deep learning approach for sleep stage classification with single-channel EEG based on pytorch

For: Advanced Machine Learning Course

2023

Robust analysis of a state of the art load frequency controller for power systems

For: Robust Control Course

2023

Robust MIMO secondary frequency modeling and control of Shahid Rajaei combined cycle power plant using classic and deep learning methods

For: Msc Thesis

2024
